*An authorization explicitly allows funding for a certain program and / or directs a federal agency to take a certain action. Authorizations express the House's intent to spend, however, actual funding is provided through the annual appropriations process. **Authorizations that would result in no significant net cost, net decreases or neutrality in mandatory spending, private-sector costs from federal mandates, and tax cuts (or other adjustments in the federal revenue stream) are not included in the totals.**

Mandatory spending directly establishes an appropriation. No subsequent action is required for the money to be spent.

The Money Monitor only accounts for original bills as they first passed **the House**. The Money Monitor does not account for conference reports. Costs of conference reports that became public laws are accounted for by a separate RSC report on the costs of bills signed into law.
